

## Lab 03

### Pre-Lab reading:

From “All of Programming” book read Page 31 to Page 38 (Section 2.4 Conditional Statements to Section 2.6 Loops)

**Task 1** Write a program that prints all even numbers from N to M, where N and M are user input integers.

**Task 2** Write C programs that output the following patterns exactly. Use as *few lines of code as possible*. You are free to use **integers**, **loops**, and **conditional statements** (e.g if/else). No functions or arrays are allowed.

[illegible]
